## SUMMARY

Pre-final year Computer Science Engineering student with hands-on experience in backend development, REST API engineering, IoT systems, and full-stack web development. Currently working as a Full Stack Developer Intern with backend focus, building production-oriented software solutions. Hackathon winner with IEEE publication, passionate about Java backend development and scalable application design.

## TECHNICAL SKILLS

### PROGRAMMING LANGUAGES

- JAVA
- SQL

### WEB TECHNOLOGIES

- HTML
- CSS

### TOOLS & PLATFORMS

- GIT
- GITHUB
- POSTMAN
- VISUAL STUDIO CODE
- XAMPP
- DOCKER

### CORE CONCEPTS

- OBJECT-ORIENTED PROGRAMMING
- DBMS

### AI & DEVELOPER TOOLS

- CHATGPT
- OPENAI CODEX
- OLLAMA
- OPENCLAW
- PAPERCLIP

## INTERNSHIP EXPERIENCE

### MoviCloud Labs Pvt Ltd

FULL STACK DEVELOPER INTERN (BACKEND FOCUS)

**DURATION:** [JAN 2026 – PRESENT]

**Tools & Technologies:** REST APIs, MySQL, MongoDB, Backend Development, Full Stack Web Development, Flutter.

**Description:**

- Developed RESTful APIs for application modules
- Designed database schemas and backend workflows using MySQL/MongoDB
- Implemented CRUD operations, request handling, and API integration
- Worked on authentication, debugging, and backend testing
- Supported full-stack application development in production workflow

## PROJECTS

### 1. SMART-AID (Hackathon Winning Project)

**Role:** IoT Developer

**Date:** Oct 2025

**Team Size:** 4

**Technologies Used:** IoT Sensors, Accelerometer, Gyroscope, GPS, AI Logic, Mobile/Web Platform Integration

**Description:**

Our project is an AI-powered emergency response system designed to reduce the delay between accidents and medical assistance.

**Key Contributions:**

- Developed accident detection logic using accelerometer and gyroscope sensor integration.
- Built automated emergency alert workflow with real-time location sharing.
- Designed stakeholder connectivity between patients, ambulance drivers, and hospitals.
- Applied intelligent ambulance and hospital selection logic to reduce emergency response time.
- Focused on improving golden-hour treatment efficiency and emergency coordination.

**Achievement:** 1st Prize Winner in Hackathon

## 2. TRUSTTRADE

**Role:** Frontend Developer / Database Developer

**Date:** January 2026

**Team Size:** 4

**Technologies Used:** HTML, CSS, JavaScript, MySQL, PHP, XAMPP

**Description:**

TrustTrade is a secure digital trading platform designed to solve trust issues in online peer-to-peer transactions.

**Key Contributions:**

- Designed secure user verification workflow to reduce fake identities and trading fraud.
- Developed transaction tracking and trust-based reputation management workflows.
- Created database structures for user management, transaction history, and dispute handling.
- Implemented secure communication and accountability-focused transaction flow.
- Contributed to payment protection concepts including escrow-based transaction safety. includes product safety.

## 3. DIGSAFE

**Role:** IoT Developer / Frontend

**Date:** Oct 2025

**Team Size:** 4

**Technologies Used:** IoT Sensors, ESP32, Monitoring Dashboard, 5G Integration

**Description:**

DIGSAFE is a smart industrial safety helmet designed for mine workers and construction workers operating in hazardous environments.

**Key Contributions:**

- Built real-time worker safety monitoring solution using sensor-based detection.
- Integrated gas, environmental, and biometric monitoring systems.
- Enabled remote alert monitoring using connected communication infrastructure.
- Focused on accident prevention and rapid hazard identification.

**Research Impact:**

Published as an IEEE conference research paper.

---

## EDUCATION

Bachelor of Engineering in Computer Science and Engineering

M. Kumarasamy College of Engineering, Karur

Year - 2023 – 2027

CGPA: 6.8 (Till 5th Semester)

**Higher Secondary Certificate (HSC)**

Kongu Matric Higher Secondary School

Year - 2022 - 2023

Score: 65.1%

---

## ACHIEVEMENTS

- 1st Prize – Hackathon Winner (₹10,000 Cash Prize), Kongu Engineering College, Erode.
  - 1st Prize – Gen-Craft Appathon, M Kumarasamy college of Engineering, Karur.
  - 1st Prize – Gen-Craft Hackathon, M Kumarasamy college of Engineering, Karur.
  - Participated in Build for Bengaluru Hackathon, REVA University, Bengaluru.
  - Participated in multiple hackathons, ideathons, and innovation competitions.
- 

## CERTIFICATIONS

- Japanese Language Proficiency Test (JLPT N5)
- NPTEL Certification – Internet of Things
